Fake company

Hiring Manager

Re: Application for LLM Engineer Position

Dear Hiring Manager, I am writing to express my strong interest in the LLM Engineer position at Fake company. With my Master's in Computational Linguistics from the University of Stuttgart and extensive experience in machine learning and natural language processing, I am confident I would be a valuable addition to your team. Currently pursuing my Master's degree with a focus on Deep Learning for Speech & Text, Information Retrieval & Text Mining, and Machine Translation, I have developed strong technical skills in Python programming, PyTorch, TensorFlow, and various NLP frameworks including HuggingFace and NLTK. My academic work includes projects in speech signal processing, eye-tracking analysis, and developing explainable AI systems using SHAP and Integrated Gradients. My professional experience includes roles at leading European organizations such as GOPA Com., WONCA, and the European Platform for Rehabilitation (EPR). In these positions, I have successfully coordinated EU-funded digital innovation projects, managed international stakeholder networks, and contributed to policy development in healthcare and social sectors. These experiences have strengthened my project management skills and given me valuable insight into European policy frameworks. What particularly excites me about the opportunity at Fake company is the potential to apply my technical expertise in computational linguistics and machine learning to real-world challenges. My background in both academic research and practical project coordination uniquely positions me to bridge the gap between cutting-edge NLP research and business applications. I have also been recognized for my academic achievements, receiving merit scholarships from the University of Kent and the Eastwest European Institute, and I was selected for the Erasmus Mobility Program. Additionally, I have served as a Student Representative for the MSc Computational Linguistics program, where I facilitated communication between students and faculty. I would welcome the opportunity to discuss how my technical skills, academic background, and professional experience can contribute to Fake company's objectives. Thank you for your consideration of my application. I look forward to hearing from you. Sincerely, Gloria Galasso

Best regards,

Gloria Galasso

M.Sc. Computational Linguistics
